

GENDER PAY GAP REPORT 2018

Plymouth CAST as an employer is required by law to carry out Gender Pay reporting under the Equality Act 2010 (Gender Pay Gap information) Regulations 2017. This involves carrying out six calculations that show the difference between the average earnings of men and women in our organisation. We are required to publish the results on our own website and a Government website.

The effective date for reporting was 31st March 2019, based on a snapshot of data as at February 2018. At that time, the trust had 1,556 Full Pay Relevant Employees, of which 148 were male and 1,408 were female.

Plymouth CAST operates as an equal opportunities employer, and does not discriminate in any way (as defined by the Equalities Act 2010 and other relevant legislation), in respect of recruitment, performance management and employee development opportunities. Gender plays no part in the assessment of salary grades at the Trust.

The results for the statutory calculations are:

1. The Mean Gender Pay Gap – The difference between the mean hourly rate of pay that male and female full pay relevant employees receive: **23.84%**. This means that, overall female employees receive lower pay than male employees do.
2. The Median Gender Pay Gap – The difference between the median hourly rate that male and female full-pay relevant employees receive: **36.62%**. This means that, typically female employees receive lower pay than male employees do.
3. The Mean Bonus Gender Pay Gap – This indicator is not applicable to Plymouth CAST.
4. The Median Bonus Gender Pay Gap – This indicator is not applicable to Plymouth CAST.
5. The proportion of males and females receiving a bonus payment – This indicator is not applicable to Plymouth CAST.
6. The proportion of males and females in each quartile pay band:

Quartile	Male	Female
Upper	15.24%	84.76%
Upper Mid	11.54%	88.56%
Lower Mid	6.14%	93.86%

Lower	5.8%	94.2%
-------	------	-------

Supporting Statement and Narrative

It is not unusual for Multi-Academy Trusts of our size and type to report large mean and median pay gaps. Our mean gap is in line with the national average for organisations employing a large number of professional staff. Our median gap is larger, reflecting the imbalance in the numbers of staff employed in our support functions, such as teaching assistants, meal time assistants and administration roles, many of which are part time (48 males to 757 females) and are not as attractive to males as evidenced by job application rates.

In respect of the upper quartile 85% is made up of women, with 15 of our highest 20 earners being female.
